EDUCATION

MBA (DS & AI)	2025-2027	Indian Institute of Technology, Mandi	**7.24/10 CGPA**
B.Tech (Chemical)	2018-2022	Anna University	**8.01/10 CGPA**

PROFESSIONAL EXPERIENCE

Haber, Product Analyst, Pune — **July '22-July'25**

Responsibilities

- **Delivered AI-driven chemical optimization solutions** across 10+ industrial plants through direct client engagement, reducing chemical consumption by **15-20%** and lowering operational costs for paper and water treatment sector customers.
- **Owned end-to-end product lifecycle** for 2 flagship products (Kaiznn, Mt. Fuji) spanning **requirements gathering (PRD), roadmap prioritization, iterative development, and go-to-market delivery**, ensuring feature-market fit through continuous cross-functional stakeholder management.
- **Designed and shipped real-time operational dashboards** (product analytics), enabling live visibility into 15+ critical plant KPIs and replacing manual monitoring workflows across client sites.
- **Led Voice-of-Customer research** through 100+ on-site customer discovery interactions; synthesized pain points into structured product requirements that directly shaped the roadmap for two flagship features.
- **Partnered with data science on ML model validation** for chemical dosing automation, improving dosing accuracy by **8%** and reducing process variance, driving a **12-15%** reduction in chemical costs.
- Authored **SOPs and onboarding/training programs** that improved customer time-to-value, reducing new site onboarding time by **30%** and cutting data error rates by ~20% across 5+ newly commissioned sites.

Agile Capital Services, Marketing Intern, New Delhi — **May '26 – Jul'26**

Responsibilities

- Assisted in promoting **customized financial and recruitment solutions** at ACS through client outreach, market research, and lead generation initiatives to enhance **customer engagement and business growth**.

Haber, Process Engineering Intern, Pune — **April '22 – Jul '22**

Responsibilities

- **Monitored real-time product dashboards** tracking critical process parameters for paper industry clients, ensuring operational continuity and proactive issue flagging.
- Authored a **competitive/benchmarking analysis report** across live client applications, identifying 3 process improvement opportunities that fed into the product team's backlog.

Academic Projects

Responsibilities

Enterprise Credit Risk Command Center | Product Strategy, PRD & Roadmap, HTML/CSS/JS, Node.js

- Defined the **PRD, product roadmap, user stories, and OKRs** for a Salesforce FS Cloud/ServiceNow-style credit risk platform, then built the case/queue engine, disposition workflows, audit trail, and role-based access.
- Built a Node.js pipeline turning the Kaggle Home Credit dataset (307,511 applicants) into a calibrated schema, reproducing the true **8.07%** default rate to ground product decisions in real data.

Retail Waste & Profit Optimization | Prioritization Framework, Python, Pandas, EDA, Predictive Modeling

- Analyzed 100K retail transactions (50 stores) to identify and **prioritize waste/profit drivers** - frozen meals had the highest waste, low velocity the strongest predictor.
- Built an EDA-to-modeling pipeline producing data-driven recommendations on markdown pricing, overstock reduction, and category-specific inventory strategy.

AI-Assisted Chemical Reduction & Process Automation | Python, ML Model Validation, Process Engineering

- Validated ML algorithms automating chemical dosing in water treatment plants, improving dosing accuracy by **8%** and cutting chemical costs **12-15%**.

LaunchGuard AI | Next.js, TypeScript, FastAPI, PostgreSQL, Docker

- **Architected and developed** a full-stack **Product Delivery Operating System** using **Next.js, TypeScript, and FastAPI**, unifying **agile sprint execution, product strategy**, and documentation into a centralized platform backed by **PostgreSQL.**
- **Engineered a Multi-Agent AI Governance Engine** that autonomously audits **Product Requirement Documents (PRDs)** for edge cases, analyzes **sprint velocity metrics**, and calculates quantitative **Deployment Confidence scores** to validate production readiness.

Awards and Achievements

- Led end-to-end coordination of flagship events AIEXCELERATE 3.0 and HIBS 3.0, managing cross-functional teams, event logistics, speaker engagement, and execution timelines.
- Spearheaded planning and on-ground operations for large-scale institutional events, ensuring seamless execution, stakeholder coordination, and high participant engagement.

Skills

Analytics & AI: Python (Pandas, NumPy, Scikit-learn), Power BI, Data Visualization, ML Model Validation, Statistical Analysis
Product & Strategy: Product Road mapping, User Research, Requirements Gathering, Process Optimization, Stakeholder Management
Domain Knowledge: Industrial IoT Product Engineering, AI-driven Automation, SaaS Product Operations, Dashboard Design
Tools & Platforms: Power BI, Microsoft Excel, GitHub (basic), JIRA (exposure)
Soft Skills: Cross-functional Collaboration, Executive Communication, Critical Thinking, Adaptability, Client Engagement.
